Alma park West	Public park	Bounded by Alma Rd., Dandenong Rd and railway line.	R	19c	<p>The western part of Alma Park comprises more exotic garden elements and is more of a garden than the eastern park, although recent planting particularly at the northern section is altering the historic character. Much of the garden beds along the centre of the park are edged with volcanic rock typical of 19c-c1920s. At either side of the central garden beds are rows of mature elms and other trees. A small slate-roofed house 1880s is adjacent to the Dandenong Rd. entrance but intrusively fenced from the park. Nearby are inappropriate CCA-treated posts next to the path to the house. In this area are many inappropriate modern plantings of natives such as wattles, <i>Melaleuca</i> sp., etc. which limit views into and out of the park. Elms may indicate former carriage drive through park?. Extensive range of exotic plantings in beds and grassed surrounds have been replaced in many instances with inappropriate natives. Mature trees include <i>Phoenix canariensis</i>, <i>Platanus</i> sp. (dieback?), <i>Grevillea robusta</i>, <i>Cedrus deodara</i>, rows of <i>Pinus radiata</i>, <i>Populus deltoides</i>, mixed <i>Eucalyptus</i> sp., Garden beds include <i>Tecoma stans</i>, <i>Pittosporum undulatum</i> (overgrown), <i>Photinia serrulata</i>, <i>Cotoneaster serotinus</i>, <i>Nerium oleander</i>, <i>Garrya a elliptica</i>, hollies, <i>Raphiolepis</i> sp., <i>Viburnum tinus</i>, <i>Arbutus unedo</i>, cannas and at the southern end a section of succulents. The most distinctive feature of the park is a small garden pavilion in the garden beds near an avenue of olive trees, (another former carriage drive?) and golden privet hedging, 2 x <i>Pinus pinea</i>, and underneath a large <i>Cedrus deodara</i>. The pavilion has no plaque but a bitumen base, silver metal onion-top dome roof with timber seating and cross bracing. At the southern end of the park is an open lawn area with mixed specimen trees including <i>Brachychiton populneus</i>, <i>Phoenix canariensis</i> x 3, a very large <i>Ficus macrophylla</i> near the rail line, and a bitumen bike path between the rail line and a row of mature <i>Schinus molle</i> var <i>areira</i>.</p>	Outside of Area 12

Alma Park	Public park & sporting reserve	Bounded by Alma Rd, Westbury St., Dandenong Rd and railway line	R	19c	Northern part of park has oval and southern section mainly passive recreation with mature trees throughout the park including numerous <i>Quercus suber</i> , large <i>Ficus macrophylla</i> (adventure play equipment connected into tree/?damage), <i>Araucaria columellaris</i> , <i>Eucalyptus cladocalyx</i> , <i>Salix</i> sp., <i>Ulmus parvifolia</i> , <i>Quercus robur</i> . Gravel paths, major path bitumen, small play equipment pieces within large area devoted to adventure play, oversized tyre structure, sculpture, bbq, grasses, pond with creek running through it, modern lights (?inappropriate modern teardrop shape). Main path/road avenue of elms alternating with mature <i>Pinus radiata</i> . Mature row of <i>Pinus radiata</i> on west side of park near rail cutting c1920s. Seedling <i>Quercus suber</i> on rail embankment. Northern part of park near Dandenong Rd., entrance contains two old <i>Quercus suber</i> , <i>Grevillea robusta</i> , <i>Lagunaria patersoni</i> , <i>Eucalyptus camaldulensis</i> , <i>Pinus radiata</i> and elms. Newer planting of native trees, shrubs and grasses. Memorial plaque dated 14.5.1975 at base of large gum to Dr Harry Ireland, councillor of St Kilda 1966-73, died 28.2.1974. Poor screening from flats & buildings on eastern side of park. Main bitumen path in poor repair for many elderly users of park. Use of recreational facilities in southern part of park too intensive and considerable compaction and wear evident.	Outside of Area 12

Wall of red brick panels and pillars of basalt (rough Cemetery Kilda & detailed), with bluestone capping. Dandenong Rd. cast iron two rail fencing, golden privet hedge behind for entire length of wall. Alma Rd. wall same as Dandenong Rd. wall. Frederick D Michaelis lawn and gardens at Dandenong Rd. entrance. Side walls (Hotham St. & Alexandra St.) of cemetery of red brick with bluestone base and capping. Planting of Platanus sp. and Eucalyptus ficifolia (not Cupressus torulosa). Small Jewish section just within the southern entrance and another pavilion. (P) Pedestrian entrance gate with bluestone pillars & 2 x Cupressus torulosa inside (1920s or earlier). Front main wrought iron gates need repair. Plantings mainly mature evergreen exotics but newer plantings of natives & others (Eucalyptus maculata, Alnus jorullensis, Acer sp., Eucalyptus botryoides) largely inappropriate and causing damage to graves, brick gutters and surfaces. Additional damage caused by seedlings such as plan and ash trees in graves. Subsidence of graves is also a problem.	Area 16
