Historical Mining Activity - Shafts

Elwood Foreshore Reserve, Elwood, VIC 3184

Historical Mining Activity - Shafts

Mine Shaft Locations were collected by a variety of methods from 1869 in some areas of the state, mainly concentrating in Ballarat and Bendigo. In places a shaft may be recorded multiple times with a different source. In cases where several shaft locations are shown close together (generally with separations less than stated position errors) and they have different sources, it is possible that one shaft has been mapped several times. In cases where several shaft locations are shown close together but they have the same information source, it is possible that each shaft location represents a different shaft on the ground.

Historical Mine Shafts within the dataset buffer:

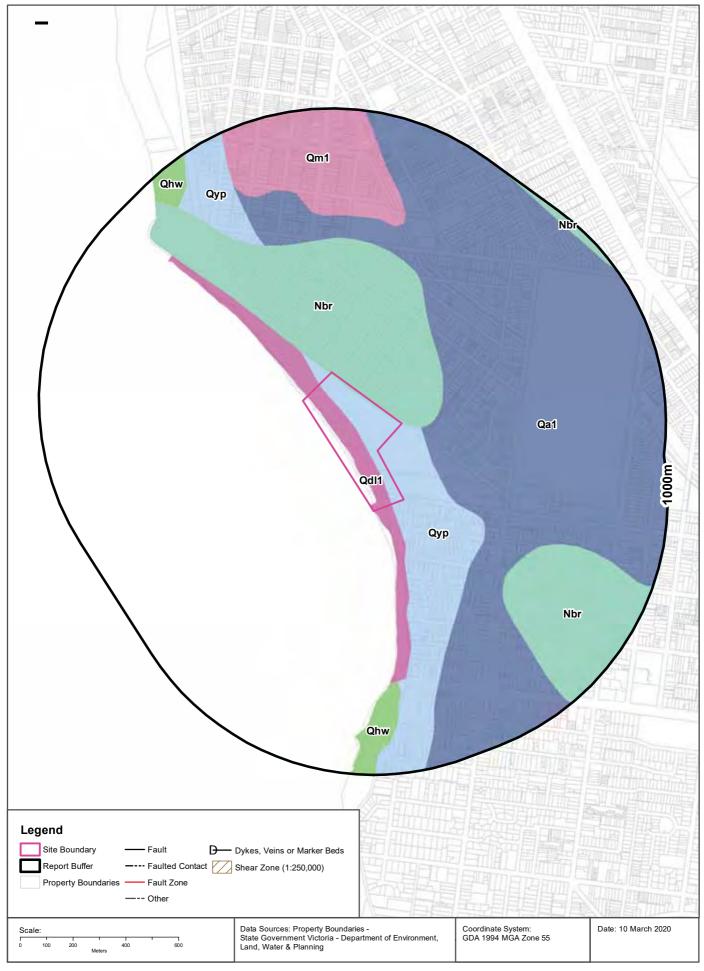

Map Id	Name	Source	Depth (m)	Collar (ft)	Fill/Cap Method	Location Desc	Location Accuracy	Distance	Direction

Geological Units

What are the Geological Units onsite?

Symbol	Name	Description	Geological Age	Lithology	Dataset
Nbr	Red Bluff Sandstone (Nbr): generic	Sandstone, conglomerate: pale yellow and brown; fine to coarse-grained, massive to well bedded; cross-bedded; local ironstone	Miocene to Pliocene	conglomerate (significant); sandstone (significant)	1:50,000
Qdl1	coastal dune deposits (Qdl1): generic	Sand, silt, clay: well sorted, poorly consolidated; coastal dune and beach deposits, some swamp deposits	Holocene to Holocene	sand (significant); silt material (significant); clay lithology (significant)	1:50,000
Qyp	Port Melbourne Sand(Qyp): generic	Aeolian and beach ridges. Bedded and cross-bedded sand, moderately silty, with shelly fossils including bivalves and gastropods.	Holocene to Holocene	medium sand material (all); fine sand (all)	1:50,000

What are the Geological Units within the dataset buffer?

Symbol	Name	Description	Geological Age	Lithology	Dataset
Nbr	Red Bluff Sandstone (Nbr): generic	Sandstone, conglomerate: pale yellow and brown; fine to coarse-grained, massive to well bedded; cross-bedded; local ironstone	Miocene to Pliocene	conglomerate (significant); sandstone (significant)	1:50,000
Qa1	alluvium(Qa1): generic	Gravel, sand, silt: variably sorted and rounded; generally unconsolidated; includes deposits of low terraces; alluvial floodplain deposits	Pleistocene to Holocene	gravel material (significant); sand (significant); silt material (significant)	1:50,000
Qdl1	coastal dune deposits (Qdl1): generic	Sand, silt, clay: well sorted, poorly consolidated; coastal dune and beach deposits, some swamp deposits	Holocene to Holocene	sand (significant); silt material (significant); clay lithology (significant)	1:50,000
Qhw	waste deposits (Qhw): generic	Clayey silt containing organic and non-organic material; land fill of various kinds.	Holocene to Holocene	fill (all)	1:50,000
Qm1	swamp and lake deposits (Qm1): generic	Grey to black carbonaceous mud, silt, clay, minor peat: generally unconsolidated; rare dolomite	Pleistocene to Holocene	mud (major proportion); silt material (significant); clay lithology (significant); peat (minor proportion)	1:50,000
Qyp	Port Melbourne Sand(Qyp): generic	Aeolian and beach ridges. Bedded and cross- bedded sand, moderately silty, with shelly fossils including bivalves and gastropods.	Holocene to Holocene	medium sand material (all); fine sand (all)	1:50,000

Location Confidences

Where Lotsearch has had to georeference features from supplied addresses, a location confidence has been assigned to the data record. This indicates a confidence to the positional accuracy of the feature. Where applicable, a code is given under the field heading "LC" or "LocConf". These codes lookup to the following location confidences:

LC Code	Location Confidence
Premise match	Georeferenced to the site location / premise or part of site
General area or suburb match	Georeferenced with the confidence of the general/approximate area
Road match	Georeferenced to the road or rail
Road intersection	Georeferenced to the road intersection
Feature is a buffered point	Feature is a buffered point
Land adjacent to geocoded site	Land adjacent to Georeferenced Site
Network of features	Georeferenced to a network of features

USE OF REPORT - APPLICABLE TERMS

The following terms apply to any person (End User) who is given the Report by the person who purchased the Report from Lotsearch Pty Ltd (ABN: 89 600 168 018) (Lotsearch) or who otherwise has access to the Report (Terms). The contract terms that apply between Lotsearch and the purchaser of the Report are specified in the order form pursuant to which the Report was ordered and the terms set out below are of no effect as between Lotsearch and the purchaser of the Report.

- 1. End User acknowledges and agrees that:
 - (a) the Report is compiled from or using content (Third Party Content) which is comprised of:
 - (i) content provided to Lotsearch by third party content suppliers with whom Lotsearch has contractual arrangements or content which is freely available or methodologies licensed to Lotsearch by third parties with whom Lotsearch has contractual arrangements (Third Party Content Suppliers); and
 - (ii) content which is derived from content described in paragraph (i);
 - (b) Neither Lotsearch nor Third Party Content Suppliers takes any responsibility for or give any warranty in relation to the accuracy or completeness of any Third Party Content included in the Report including any contaminated land assessment or other assessment included as part of a Report;
 - (c) the Third Party Content Suppliers do not constitute an exhaustive set of all repositories or sources of information available in relation to the property which is the subject of the Report (Property) and accordingly neither Lotsearch nor Third Party Content Suppliers gives any warranty in relation to the accuracy or completeness of the Third Party Content incorporated into the report including any contaminated land assessment or other assessment included as part of a Report;
 - (d) Reports are generated at a point in time (as specified by the date/time stamp appearing on the Report) and accordingly the Report is based on the information available at that point in time and Lotsearch is not obliged to undertake any additional reporting to take into consideration any information that may become available between the point in time specified by the date/time stamp and the date on which the Report was provided by Lotsearch to the purchaser of the Report;
 - (e) Reports must be used or reproduced in their entirety and End User must not reproduce or make available to other persons only parts of the Report;
 - (f) Lotsearch has not undertaken any physical inspection of the property;
 - (g) neither Lotsearch nor Third Party Content Suppliers warrants that all land uses or features whether past or current are identified in the Report;
 - (h) the Report does not include any information relating to the actual state or condition of the Property;
 - the Report should not be used or taken to indicate or exclude actual fitness or unfitness of Land or Property for any particular purpose
 - the Report should not be relied upon for determining saleability or value or making any other decisions in relation to the Property and in particular should not be taken to be a rating or assessment of the desirability or market value of the property or its features; and
 - (k) the End User should undertake its own inspections of the Land or Property to satisfy itself that there are no defects or failures
- 2. The End User may not make the Report or any copies or extracts of the report or any part of it available to any other person. If End User wishes to provide the Report to any other person or make extracts or copies of the Report, it must contact the purchaser of the Report before doing so to ensure the proposed use is consistent with the contract terms between Lotsearch and the purchaser.
- 3. Neither Lotsearch (nor any of its officers, employees or agents) nor any of its Third Party Content Suppliers will have any liability to End User or any person to whom End User provides the Report and End User must not represent that Lotsearch or any of its Third Party Content Suppliers accepts liability to any such person or make any other representation to any such person on behalf of Lotsearch or any Third Party Content Supplier.
- 4. The End User hereby to the maximum extent permitted by law:
 - (a) acknowledges that the Lotsearch (nor any of its officers, employees or agents), nor any of its Third Party Content Supplier have any liability to it under or in connection with the

- Report or these Terms;
- (b) waives any right it may have to claim against Third Party Content Supplier in connection with the Report, or the negotiation of, entry into, performance of, or termination of these Terms; and
- (c) releases each Third Party Content Supplier from any claim it may have otherwise had in connection with the Report, or the negotiation of, entry into, performance of, or termination of these Terms.
- 5. The End User acknowledges that any Third Party Supplier shall be entitled to plead the benefits conferred on it under clause 4, despite not being a party to these terms.
- 6. End User must not remove any copyright notices, trade marks, digital rights management information, other embedded information, disclaimers or limitations from the Report or authorise any person to do so.
- 7. End User acknowledges and agrees that Lotsearch and Third Party Content Suppliers retain ownership of all copyright, patent, design right (registered or unregistered), trade marks (registered or unregistered), database right or other data right, moral right or know how or any other intellectual property right in any Report or any other item, information or data included in or provided as part of a Report.
- 8. To the extent permitted by law and subject to paragraph 9, all implied terms, representations and warranties whether statutory or otherwise relating to the subject matter of these Terms other than as expressly set out in these Terms are excluded.
- 9. Subject to paragraph 6, Lotsearch excludes liability to End User for loss or damage of any kind, however caused, due to Lotsearch's negligence, breach of contract, breach of any law, in equity, under indemnities or otherwise, arising out of all acts, omissions and events whenever occurring.
- 10. Lotsearch acknowledges that if, under applicable State, Territory or Commonwealth law, End User is a consumer certain rights may be conferred on End User which cannot be excluded, restricted or modified. If so, and if that law applies to Lotsearch, then, Lotsearch's liability is limited to the greater of an amount equal to the cost of resupplying the Report and the maximum extent permitted under applicable laws.
- 11. Subject to paragraph 9, neither Lotsearch nor the End User is liable to the other for:
 - (a) any indirect, incidental, consequential, special or exemplary damages arising out of or in relation to the Report or these Terms; or
 - (b) any loss of profit, loss of revenue, loss of interest, loss of data, loss of goodwill or loss of business opportunities, business interruption arising directly or indirectly out of or in relation to the Report or these Terms,

irrespective of how that liability arises including in contract or tort, liability under indemnity or for any other common law, equitable or statutory cause of action or otherwise.

12. These Terms are subject to New South Wales law.

Club History

The Royal Life Saving Society of Australia was formed in 1894 with a branch established in Sydney. The Victorian branch was inaugurated at the Port Phillip Club Hotel in Melbourne on December 6th, 1904.

The first Club in Victoria was established at Elwood in 1911, on the old rifle range, near Point Ormond. The Club's founding fathers were at the forefront of the push to change State legislation to allow "open sea" and "mixed-sex" bathing during daylight hours. Until these changes were made, bathing in the sea could only be done inside the many enclosed "bathing houses" which dotted the shoreline of the northern reaches of Port Phillip Bay.

Today, only the Middle Brighton Seabaths remain. The Royal Life Saving Society of Australia Annual Report of the day noted that the Life Saving Club would be "equipped with the necessary appliances for treatment of the apparently drowned".

The Foundation Stone of the Club's first permanent clubhouse was laid on 5th October 1918, near the beach end of Head Street. The Life Saving Club quickly became an integral part of Elwood's social fabric. By the mid-1920s the Club had nearly 500 members! At various times, the Club has had its own football, tennis, table tennis, gymnastic and card teams in local competitions. The Club became famous for its weekly Sunday night dances, attended by hundreds, which became known simply as "The Bullfight". It was the only club of any sort to be allowed to operate its own ambulance service. It became one of the focal points for water safety around all of Port Phillip Bay.

From the 1950s, in conjunction with Radio 3KZ, and later 3AW, weather reports and bay conditions were reported across Melbourne from the Club. It is reckoned that, in favourable weather, crowds of up to 100,000 people flocked to Elwood Beach in the 1960s and 70s!

The Clubhouse building was finally demolished in the early 1970s and, with the assistance of the then City of St. Kilda, new premises were erected at the present site. This grey cement block, bunker-style building honours Mr John. R. (Jack) Conabere, who with his wife and family, provided great service and leadership to Elwood Life Saving Club, to Life Saving generally and to the wider community over many years.

In 2004, the Club moved to the new, purpose-built premises within the John R. Conabere Pavilion. The Club expresses its gratitude to the City of Port Phillip and "Sails on the Bay" Restaurant for their parts in providing this excellent facility.

2.0 Thematic History

2.1 The Developing Foreshore

2.1.1 Early Occupation of the Elwood Coastline

For thousands of years prior to colonisation, the distinguishing feature on the strip of coastline between St Kilda and Brighton was a steep headland of red sandstone early settler later named Red Bluff. This was a landmark amongst the local Aboriginal community, the Bunurong, who used it for communal and social gatherings. It was evidently still a focus for indigenous people as late as the 1860s, as recalled by one early Elwood resident, Mrs Florence (Dougharty) Huon (1858-1929) who stated that, during her childhood, Aboriginals were still frequent visitors to Red Bluff, as the sand contained large beds of cockles.¹ The discovery of a shell midden on the site over a century later, in 1974, not only confirms Mrs Huon's recollection, but indicates that Red Bluff (subsequently renamed Point Ormond) was an important campsite for the Bunurong for many years.²

In August 1835, Red Bluff first attracted the attention of Melbourne's early settlers, when John Pascoe Fawker's schooner, the *Enterprize*, dropped anchor there *en route* to the lower Yarra.³ Five years later, it was chosen as a suitably remote site for the colony's first quarantine station. This was necessitated by the crisis that occurred when the barque *Glen Huntly* arrived at Williamstown on 17 April 1840 with a number of typhoid-stricken passengers. Superintendent Latrobe ordered that the barque cross the bay and dock at Red Bluff, where two camps were established: one for afflicted passengers, and another for those remaining in good health. Two months passed before the passengers were permitted to leave, whereupon the station was closed. The graves of those who had died were enclosed by a picket fence and remained as a memorial to the tragedy.

Separated from nearby St Kilda by a vast swamp, the foreshore around Port Ormond was clearly considered to be a suitably remote location for some of the more objectionable facilities required by a fledgling settlement. In 1857, the St Kilda Council established a night soil depot at the intersection on Barkly Street and, later that same year, applied to the Department of Land & Survey to occupy an adjacent two acre site, bisected by the Elster Creek, for the purpose of an abattoir.⁴ In December, the Melbourne Hunt Club was also granted a license to occupy some nearby land, on which they erected kennels for their hounds.⁵ The adjacent abattoir site, meanwhile, was granted to the council in 1858, and an open slaughter yard was established, for which purpose a small timber bridge was erected over the creek a year later.⁶ The new abattoir building followed in 1861.

As residential development burgeoned in Elwood in the 1850s and '60s, the manure depot and the abattoirs became a much-maligned bone of local contention. In the face of strong opposition from local residents, and repeated complaints to the Central Board of Health, the manure depot was finally closed in 1869.⁷ The abattoir, however, remained in operation for another three decades before closing in 1898. The changing attitudes towards noxious practices along Elwood's foreshore also became evident when the council proposed to build its municipal garbage destructor at Point Ormond in 1890, only to be refused by the Department of Land and Survey on the grounds that the land has been 'permanently reserved for recreational purposes'.⁸ It was also during the 1890s that erosion around Point Ormond threatened to disturb the sixty-year-old graves of the *Glen Huntly* typhoid victims, and the remains were finally exhumed in 1898 and re-interred at the St Kilda Cemetery. By the turn of the century, the last few vestiges of unpleasant mid-nineteenth century history had been exorcised from Elwood's foreshore, leaving the path open for recreational development.

The Development of Recreation on Elwood Beach

An early parish plan indicates that the site of Elwood Beach, comprising 54 acres of land between Point Ormond and present-day Head Street, extending east to the Esplanade, had been permanently reserved as a Public Garden, with an 11-acre reserve at the southern end for a rifle range. In 1865, the Government proposed to sell off this land for private development, but concerned residents made representations to have the lots withdrawn from sale on the grounds that 'the land, at present, is being used by the public as a reserve'. Some of the land at Point Ormond was subsequently proposed for annexure as part of the coastal recreation reserve, with a survey map, prepared by Clement Hodgkinson in January 1869, annotated thus:

[It is] proposed that the strip of land . . . comprising the tip of Point Ormond, be placed under the control of a Committee of Management to consist of four owners of land in Elwood and the Mayor of St Kilda ... subject to the condition that this land will be enclosed by private subscription of landholders at Elwood, with a view to it being subsequently converted into an ornamental plantation and recreation ground'. 10

The committee was duly formed although, as local historian John Butler Cooper noted, the Mayor of St Kilda was not amongst its members. By this time, the council had already made a number of improvements to the beach reserve, including tree-planting and the construction of a coastal promenade.¹¹

However, it was not until the early twentieth century that Elwood Beach really began to develop as a recreational centre. In 1907, the rifle butts in Head Street were finally closed at the urging of the St Kilda and Brighton councils, which freed up 11 acres of prime seaside land that became Elwood Park.¹² A tea kiosk was erected on Point Ormond in 1915, and this was followed, five years later, by another near Beach Avenue, which opened in 1921 under the management of Mrs Margaret Olinque (7.21). That same year, the first of a number of sporting clubs appeared along the foreshore, when the Elwood Lifesaving Club (founded 1913) built premises at the beach end of Head Street. This was followed, three years later, by the Elwood Sea Canoe Club (the first such club in Australia, later renamed the Elwood Sailing Club), a lawn bowling club (1925), an sea bathing pavilion (1928; one of three erected by the St Kilda Council that year), public tennis courts (c.1931), a croquet club (c.1937), and an angling club (c.1939).13 By contrast, there was virtually no development beyond the beach (ie north of Point Ormond and south of Cole Street), although the Grant Brothers boatshed and tea rooms had been established at the end of North Road (just outside the present study area) by 1930.14

Unfortunately, the post-war period saw the loss of a number of these early foreshore structures, including the original Point Ormond Kiosk and nearby jetty (both demolished in the 1950s), the angling clubhouse (destroyed by fire c.1957) and the sea bathing pavilion (demolished 1971). All but one of the sporting clubs rebuilt or replaced their respective premises during these years: the angling club (1958), the lifesaving club (1971; **7.23**) and the croquet club (1970s). The bowling club pavilion (**7.22**) now remains as the sole survivor of these early sporting clubs although, ironically, it no longer operates as such – it was converted into a community centre and café complex in the 1990s. Facilities for a number of previously unrepresented sports and recreational groups also established their presence along the foreshore in the post-war period, including a cricket ground (1950s), a sea scout hall (c.1958, **8.08**) and a soccer clubroom (1980).

2.2 Seaside Seats and Marine Mansions: A Prestigious Residential Address

2.2.1 The First Land Sales

Elwood's first land sale was held on 18 September 1851, when six blocks between Ormond Road and the Esplanade were auctioned at an upset of £2/10 per acre. Section 8, of 14 acres, was acquired by W B Wilmot, and the remaining five eight-acre lots by J Payne (Section 10), W W Blow (Section 11), J G Vautier (Sections 12 and 13) and James Murphy (Section 14).¹⁵ A month later, three more eight-acre blocks were sold in Melbourne, purchased by Samuel Griffiths (Sections 15 and 16) and J Murphy (Section 17). None of these early investors, however, developed their properties immediately and, even a year later, there was still only one actual resident in Elwood: one John Broadbent, a timber-cutter working at Point Ormond, who lived in a tent at a time when, as he later claimed 'nobody else had a tent or house in Elwood'.¹⁶

One of the first attempts to promote settlement in Elwood took place in 1853, when J G Vautier subdivided his land as the *Elwood Hill Estate*, comprising 60 residential lots with frontage to 'Esplanade' and 'Government Road' (Ormond Road), and two new streets, North Elwood Street (Vautier Street) and South Elwood Street (Docker Street). In May 1853, three lots were purchased by the Reverend Joseph Docker, who engaged architects Russell, Watts & Pritchard to design a pair of terrace houses, for which tenders were called in December 1854. While these remains as Elwood's oldest surviving houses, it must be considered as an anomaly because, as Andrew Ward points out, it represented an unsuccessful attempt to introduce terrace housing (ubiquitous in nearby St Kilda) into Elwood. As it would turn out, it was an entirely different housing typology – the detached mansion on a large allotment – that would strongly characterise Elwood in the second half of the nineteenth century.

2.2.2 Early Mansion Estates, 1850s and 1860s

One of the first of these grand mansions in the area was Thomas Monahan's *Erindale*, for which architect Joseph Burns called tenders in October 1854. This two-storey bluestone house, located in what is now part of Ripponlea, stood on over 16 acres on the east side of Brighton Road, just south of present-day Glen Eira Road and appears on Kearney's map of 1855. This map, which shows Elwood as far south as Glenhuntly Road, gives a clear indication of the emergence of the mansion estates. While residential development in St Kilda was quite dense, it became much sparser south of Carlisle Street (then known as Beach Road), with both sides of Brighton Road characterised by a smattering of substantial houses on large allotments. The east side was dominated by Monahan's *Erindale*, and the west by three particularly prominent mansions: one on the corner of Southey and Dryden streets, another on the east corner of Byron and Tennyson streets, and a third on the corner of Milton Street and Brighton Road. Another substantial estate, not shown on Kearney's map but built c.1855-56, was T J Nankivell's *Chiverton*, a mansion attributed to architect Leonard Terry on the west side of Brighton Road, between Burns and Scott streets. ¹⁷

¹⁷ Miles Lewis (ed). Melbourne Mansions Database. <fmweb.arbld.unimelb.edu.au/melbmansions>

The completion of the swamp reclamation project in 1910, and the first sales of the reclaimed land three years later, spurred even more intense development in that part of the suburb. Over the next few years, streetscapes of new housing spread along newly-formed Addison Street, Ruskin Street, Meredith Street and Broadway. Commercial development soon followed, with ubiquitous corner shops such as 345 Barkly Street (originally George Bearpark's grocery store, later to become Jerry's Milk Bar, **7.04**) and others flanking the intersection of Meredith and Addison streets. Elsewhere, modestly-scaled housing estates continued to proliferate, including Rothesay Avenue (42 lots, 1911), Austin Avenue (38 lots, 1914), Normanby Road (33 lots, 1915) and Heaton Avenue (49 lots, 1918). These also developed very swiftly. Directory listings show that Austin Avenue, for example, began with 'two houses being built' in 1915, jumping to nine listings in 1916, and thence to twenty listings by 1917. The first house to be built, a weatherboard villa at No 6 (**7.02**), still remains in a streetscape otherwise infiltrated by post-war apartment blocks. Timber houses such as this were, in fact, something of an anomaly in Elwood at that time, when much of this new residential development was of brick –invariably in the form of single-storey semi-detached duplexes. Even rarer, though, was the highly atypical row of three reinforced concrete houses at 2-6 Browning Street (**7.06**), erected by local builder Verney Wilson in 1912-13.

During the 1910s, intense residential settlement in Elwood prompted the expansion of associated infrastructure - and *vice versa*. Domestic power supply apparently arrived in the 1910s, after the suburb had being sidestepped when electricity mains were laid out in St Kilda (1900) and Brighton (1910) – phase that is evidenced today by a remaining Edwardian-style red brick substation in Daley Street (**7.09**). The first purpose-built church in Elwood also appeared around this time – a modest timber structure in Mitford Street for the local Methodist congregation, designed in 1910 by prolific ecclesiastical architect Alec Eggleston. It was followed, two years later, by a similarly understated timber building for the Presbyterians in nearby Scott Street, designed by the same architect (**7.27**). More conspicuous brick churches followed in the later teens, with St Bede's Anglican Church in Ormond Road (1916), and a new and larger Methodist church in Mitford Street (1918; demolished). The local Roman Catholic congregation, meanwhile, had acquired a site in the new Normandy Street subdivision in 1914, where they established a denominational school in 1918. A purpose-built church, however, would not be completed for another decade. The Methodists had already operated their own day school in Mitford Street from the early 1910s; however, it was not until 1917 that the first state school opened, on the opposite side of Poet's Grove.

Retail development also expanded significantly during the 1910s. At the same time that isolated corner shops began to spring up in the suburb's north-east, a shopping strip began to spread along that portion of Tennyson Street near the new Presbyterian church and the burgeoning subdivisions of Rothesay Avenue (1911) and Austin Avenue (1914). This shopping strip began with S H Dimond's grocery store, which opened around 1913 at what is now No 164. By 1916, it has been joined by two others – a greengrocer (No 160) and a confectioner (No 162) – and then, by 1920, four more: bootmaker, newsagent, dairy products and butcher.

RECREATION ON THE HILL AND THE BEACH

A flagpole, maybe seven metres in height, was positioned on the peak of Point Ormond hill where the wooden marker is now situated. There could also have been a circular seating arrangement at the base of the flagpole. On the **eastern** side of the hill was Point Ormond Kiosk, which was quite large in size and really a tearoom. It was very dilapidated in appearance. It smelt musty at all times and even the tearoom staff seemed quite ancient. On the **western** side of the hill commenced a pier 40-50 metres in length. The structure was destroyed in a storm during the 40s or maybe 50s. It was popular with fishermen, there being some excellent catches of flathead. On the **southern** side at the base of the hill operated a team of Shetland ponies every Sunday afternoon, summer and winter. A brief oval ride whilst being led cost threepence.

On the **northern** side I recall on a cold and miserable evening an army display at the bottom of the hill, which I think was for the purpose of selling war bonds. The highlight of the display was the demonstration of flame-thrower m ounted on a tank or Bren Gun carrier. In those days the tea tree growth was much thicker. During the war when I was a student at St Columba's, we were taken to the 'forest' to practice air raid drills when our nation felt most at threat around 1943. St Columba's was occupied by U.S. troops while we were displaced into a tennis pavilion seated three to a desk. **Ken Corbett, who grew up in Elwood from 1934 to 1957.**

Elwood beach extends north from its border with Brighton at Head Street to the green prominence at Point Ormond. These 54 acres of land adjacent to the beach and extending east to Ormond Esplanade were reserved as a public garden early after settlement. Residents fought off an attempt by the Government to sell the reserve for development in 1865. Included at the southern end of the reserve were eleven acres of rifle range that became Elwood Park in 1907.

Swamp reclamation and tramways extensions in the early 20th century kick-started Elwood Beach's transition to one of Melbourne's most popular recreational areas for families. The Elwood Surf Life Saving Club was founded in 1913, building premises at Head Street in 1921. in 1971 it moved to its current premises designed by noted architect Don Fulton in striking 'Brutalist' style. Today it serves as local lifesaving club, bathing pavilion and the State Disaster Headquarters for all marine emergencies on Port Phillip Bay.

The oldest structure on Elwood Beach is the delightful octagonal weatherboard kiosk (1915) opposite Normanby Street that has provided refreshments to bathers and visitors for an extraordinary nine decades. In 1924 the clubhouse of the first Sea Canoe Club in Australia was erected and later became the Elwood Sailing Club in 1939. Other recreational facilities following including the Croquet Club (1937), and a Sea Scout hall (c1958).

By 1930 spacious tearooms were being operated by confectioner John Wharton at Point Ormond, on the west side of Marine Parade, near Glenhuntly Road. It was demolished with the nearby jetty in the 1950s. In the 1930s and 1940s, council minutes recorded the shocking news of the public breaching restrictions by swimming in their bathers. The seabathing pavilion was demolished in 1971. The advent of motorcars saw the Elwood beach, with its car park, supplanting older beaches as a premier destination. The historic Elwood Angling Club moved from Prahran in 1939 and was rebuilt in 1957 after a fire. The Elwood Bowling Club (1925) on the foreshore opposite Vaultier Street was converted to the Beach House Community Centre and Café in the 1990s. In about 1931, public tennis courts were built. A soccer facility followed later.

At the northern end of Elwood Beach, a wooden navigation tower sits atop a gently sloping hill beside a park and playground. Peel back the multiple cultural layers of this peaceful place and you have a snapshot of the whole history of Elwood. Originally known as Little Red Bluff, the place name of Point Ormond was named for Captain Ormond, who visited Port Phillip in 1839. He returned to England and bought a small ship to bring out his family, including Francis, his son. Francis rose from early employment as a stable boy to become a large landowner and a great philanthropist. The suburb of Ormond is named after him and his statue stands in front of the Melbourne Working Men's College, later Royal Melbourne Institute of Technology.

In August 1835, Elwood had a brief opportunity to become the centre of a great metropolis when the *Enterprize*, John Fawkner's schooner, dropped anchor at Elster Creek. Fawkner later described the scene:

Each side of the red bluff (now Point Ormond) was a small inlet or bay. The one on the north...formed part of a basin into which a watercourse poured its floodwaters. The sinuous line of the watercourse was marked by fringing wattle and small gum trees. Slightly to the north, extending east alongside the stream, was a large marshy lagoon, with an outlet to the sea.

The crew was insufficiently impressed to stay for long and sailed on to the Yarra where they founded Melbourne after unloading near today's William Street. In the early decades, the Point was a prominent landmark for shipping and by the 1850s was gaining popularity as a summer picnic spot. Since 1985 there have been several reunions of descendants of the *Glen Huntley* fever ship at the site of the former quarantine station of 1840.

Fire is a recurring motif at the point. Cooking fires of the traditional owners burned here over thousands of years. Beacons were lit on the Point in 1851 to celebrate separation from NSW. In 1863, Albert Edward, Prince of Wales and eldest son of Queen Victoria, married Princess Alexandra of Denmark. Seventy tons of firewood plus barrels of tar and oil casks were hauled to Point Ormond and lit on 10 March to celebrate the event. In 1998, Australia's bicentenary was commemorated by a 'ring of fire' – the lighting of beacons around the entire Australian coastline, including one at Point Ormond.

The bluff was a favourite subject for paintings by artist, Elizabeth Parsons (1831-1897), who has left us many exquisite images. Her paintings around 1875 show the hill as a cliff or headland, not the gentle mound we see today. In the 1890s stone and sand from the bluff was used to reclaim Elwood marshlands. In 1904 the seaward edge was cut down to 2.4

3/31/2020 FLOOD

metres, despite bitter opposition, to create a seawall and extend Marine Parade. The remaining bluff was then graded to a slope reducing its height by several feet.

An abattoir and coal mine were built nearby, the former provoking protests until it was closed in 1898. The Point Ormond Improvement Scheme began on 25 may 1915 providing work for the unemployed including the construction of a refreshment kiosk designed by Carlo Catani. On 4 June 1915, a new tramway was extended to Point Ormond, enabling travel from Elsternwick railway station to the beach. The terminus, with a large passenger shelter made of green latticework slats, was next to both the tearooms and the beach.

In 1901, a Signal Station at Point Ormond made history with the first ever radio-telegraph communication to a ship at sea (HMS *St George*) from the Australian mainland.

On 18 March 1924, thousands of spectators crowded onto Point Ormond hill and the St Kilda foreshore to see the stately warships of the British Fleet enter Port Phillip Bay. They rapturously welcomed the visible evidence after the Great War that 'Britannia was still the Mistress of the Seas' and basked in the 'protective kinship of the British empire to its outlying dominions'. Twenty-two aircraft flew overhead and a choir of seven hundred children from St Kilda's two state primary schools sand Rule Britannia.

The Point has also been a focus for the arts. Actors Gregory Peck and Ava Gardner were there in 1959 for the filming of *On the Beach*, a movie about a nuclear holocaust in the future – 1964! In 1984 the Point also featured in the final scene from *A Man of Flowers* starring Norman Kaye.

In the 1970s roadwork excavations apparently uncovered a midden revealing that the point was a former campsite for the traditional owners. In 1989, local residents alleged that a UFO had landed at the point leaving a scorched circle. An amazing passage from a stone-age site to an outer-space heliport in a mere 150 or so years.

One of the lesser-known uses of public land on Elwood's beachfront was for military purposes. In the immediate aftermath of the gold rush, Melbourne was full of the yellow mineral and full of fear of its loss. Elwood was to be a key area called upon to defend the unfortified city from imagined invaders.
